### THE KAIROI HEALTH TEAM

The founders and executives of Kairoi Health collectively have decades of leadership in clinical practice strategy, healthcare policy, medical ethics, and information technology, including experience at companies such as United Health Group, Blue Shield, Kaiser Permanente, CVS Caremark, Optum, EPIC, and Oracle.

## Jeffrey Dao Joins Kairoi Health Management Team

August 1, 2017 (Boston, MA) — Kairoi Healthcare Strategies, Inc. (Kairoi Health) announced today that Jeffrey Dao has joined the company as Senior Vice President, Marketing & Business Development. Dao brings to the post 30 years of experience in the creation and management of emerging technology and new business development, most recently in biotech. A cofounder of Genyous Biomed, he was the former Co-CEO and President of Omnitura, a Genyous spinoff developing multivalent immuno-oncology therapies. Earlier he held executive marketing and business development positions with Nokia, Oracle, and Communication Intelligence Corporation (CIC).

“We are pleased to have Jeff join our organization and lead the company’s efforts to market a SaaS solution that is poised to revolutionize healthcare through proprietary analytics and schedule optimization solutions,” said Dr. John Golenski, founder and CEO of Kairoi Health. “Jeff understands the challenges of technology adoption in large enterprises, and he has valuable experience leading commercialization and channel development for Fortune 500 as well as startups.”

### About Kairoi Health

Kairoi Healthcare Strategies, Inc. (Kairoi Health) is a healthcare information technology company commercializing a breakthrough for analyzing and optimizing the efficiency of healthcare organizations. The company’s software as a service (SaaS) solution, KairoiSuite™, comprises KairoiLogic™, a robust clinical appointment analytics system, and KairoiScheduler™, a user-friendly workflow optimization application.

KairoiLogic equips clinic managers to analyze historical appointment data and identify causes of lost productivity. Easy-to-read dashboards help decision makers understand the efficiency of their practices, and to quantitatively evaluate and compare providers within their clinics. KairoiScheduler makes it easy to create scheduling templates that are based on historical data, organization goals, and the preferences of each provider (physician, nurse, medical assistant). Templates can be implemented transparently, giving providers a voice in how their schedules are structured. Decision makers can conduct “what-if” scenarios based on modifying assumptions and use of resources. Impact analysis can be done in seconds and minutes, not hours and days. KairoiSuite is cloud-based, requiring no on-site IT support.

Together, these features enable healthcare organizations to optimize provider productivity, enhance staff satisfaction, achieve performance goals, and increase revenue.
