THE KAIROI HEALTH TEAM

The founders and executives of Kairoi Health collectively have decades of leadership in clinical practice strategy, healthcare policy, medical ethics, and information technology, including experience at companies such as United Health Group, Blue Shield, Kaiser Permanente, CVS Caremark, Optum, EPIC, and Oracle.

Kairoi Health Partners with athenahealth to Deliver Cloud-Based Clinic Schedule Optimization Solution

January 16, 2018 (PRNEWswire) — Kairoi Healthcare Strategies, Inc. (Kairoi Health) today announced the launch of KairoiScheduler™, its novel solution for clinic schedule optimization, on athenahealth's marketplace, More Disruption Please. KairoiScheduler is part of KairoiSuite™, the company's integrated software solution for maximizing productivity of healthcare organizations.

With a robust optimization engine designed specifically for clinic operations, KairoiScheduler makes it easy to create scheduling templates that are based on historical data, organization goals, and the preferences of each provider (physician, nurse, medical assistant). Templates can be implemented transparently, giving providers a voice in how their schedules are structured. Decision makers can conduct "what-if" scenarios based on modifying assumptions and use of resources. Impact analysis can be done in seconds and minutes, not hours and days. KairoiScheduler is cloud-based, requiring no on-site IT support. Together, these features enable healthcare organizations to optimize provider productivity, enhance staff satisfaction, achieve performance goals, and increase revenue.

"We are pleased to partner with athenahealth in the delivery of our breakthrough workflow optimization solution," said Dr. John Golenski, founder and CEO of Kairoi Health. "As a leader in cloud-based electronic health records, athenahealth is an ideal partner for us in offering a total solution that can be rapidly deployed by clients."

About Kairoi Health

Kairoi Healthcare Strategies, Inc. (Kairoi Health) is a healthcare information technology company commercializing a breakthrough for analyzing and optimizing the efficiency of healthcare organizations. The company's software as a service (SaaS) solution, KairoiSuite™, comprises KairoiLogic™, a robust clinical appointment analytics system, and KairoiScheduler™, a user-friendly workflow optimization application. KairoiLogic equips clinic managers to analyze historical appointment data and identify causes of lost productivity. Easy-to-read dashboards help decision makers understand the efficiency of their practices, and to quantitatively evaluate and compare providers within their clinics. KairoiScheduler (described above) can be used in tandem with KairoiLogic or as a standalone application.
